

# VALV-001

Hydraulic valve pack

## Highlights

- 10 solenoids equipped, double counter balanced valve stations
- Corrosion resistant (AISI 316 L stainless steel and synthetics)
- Digital communication protocol.
- Internal oil pressure and oil temperature measurement
- Water ingress sensor
- 250 bar maximum hydraulic input pressure
- Autonomous configurable maintenance cycle
- Power limit functions to avoid electrical switching power peaks
- Pressure overload protection
- On/off and proportional control
- NG6 valve block
- Other designs and components available on request

## Specifications

Mechanical		Environmental	
<u>Dimensions</u>	See sketch below	- Rated water depth	150 msw deeper on request
